PROFILE

Highly skilled and results-driven Test Engineer with 4+ years of experience in both automation and manual testing. Proven expertise in designing and implementing automated test scripts using industry-standard tools such as Selenium, TestNG, and JUnit, combined with a solid foundation in manual testing methodologies. Experienced in working within Agile environments, collaborating with cross-functional teams to deliver high-quality software solutions on time.

SKILLS

Selenium with java	Manual Testing	Git
jUnit	Functional Testing	Jira
Cucumber	API testing	Agile Process
TestNG	MySql Quries	Asana

PROFESSIONAL EXPERIENCE

July 2022 - Present

Vcare corporation pvt. Ltd.(Telgoo5 Inc.)
Software test engineer

As an Automation Test Engineer, my primary role involves designing, developing, and maintaining automated test scripts to ensure the quality and functionality of software applications. We will create and optimize test frameworks using tools like Selenium, TestNG, or cucumber, and execute automated tests to validate various aspects of the software. Analysing test results to identify and report defects, and collaborating with cross-functional teams.

PROJECTS

Telgoo5

As a Software Test Engineer at Telgoo5, I focus on ensuring the quality and functionality of various projects, software, and extensions related to Telecom services and e-commerce website development. One of the key projects I'm working on is called Telgoo5, which is a comprehensive software suite designed for Telecom service providers. Within Telgoo5, my primary responsibilities revolve around three main areas is Billing Module, Notifications Module and Inventory Management.

Excess Telecom

Excess Telecom is the largest telecom company in the USA, specializing in providing critical government-supported programs such as the Affordable Connectivity Program (ACP) and Lifeline services. The company plays a pivotal role in bridging the digital divide by offering affordable and accessible telecom services to underserved communities. I'm responsible for testing customer's profile through website login and check after login process like check data usage, change password, change address, change plan etc.

Credo Mobile

Credo Mobile is a leading telecom provider in the USA, known for delivering a wide range of telecom services, including both postpaid and prepaid plans. The company offers high-quality mobile and tablet services nationwide. In my role, I was responsible for testing the Credo Mobile website to ensure accurate and efficient order processing. This included verifying that orders were created correctly, bills were generated with the correct amounts, and invoices were accurately produced and profile editing.

Softogrig solution pvt. ltd.   **Nov 2019 - Jun 2022**

Software test engineer

Softogrid Solution is a software development company which builds software's, Plugins, Extensions mostly for the Word Press websites. I used to handle testing for multiple projects Including Plugins, Software, and Extensions etc. I have worked on Multi-Vendor system, Prescription, Point of sale(POS).

PROJECTS

Multi-Vendor System

The Word Press Woo Commerce Multi-Vendor System Plugin explicitly developed to switch your Woo Commerce website into a multivendor platform that having multiple sellers with a separate profile. It gives sellers the functionality of adding products and order management from the seller panel.

Prescription

Prescription helps customers to buy medicines from an online pharma shop by uploading a prescription for the medicines. File attachments are useful for uploading a doctor's prescription for buying medicines, vaccines, or other types of drug products online. The types of files supported for uploading a prescription/attachment are jpg, jpeg format.

Point Of Sale (POS)

Point of Sale System which provides store owners to have the functionality, where they can easily manage their online stores along with the physical outlets. The physical stores will have a POS front-end management system for which the admin can assign a store agent who can easily manage the sales and customers at that particular store. It lets retailers manage the products along with the inventory. POS holds all the tracks for customers and their respective orders.

ROLES AND RESPONSIBILITIES

- Requirement Analysis: Reviewed and analyzed project requirements to ensure accurate testing.
- Creating Test Cases: Developed comprehensive test cases based on requirements.
- Writing Automation Code: Created and maintained automation scripts using tools like Selenium and TestNG.
- GIT (GitHub): To Pull or Push and commit code to central repository
- Running Automation Scripts: Executed automated tests to verify software functionality.
- Finding Bugs: Identified, documented, and reported defects.
- Creating Tickets in JIRA: Managed and tracked defect tickets in JIRA.
- Finding Root Causes: Analyzed root causes of issues to aid in troubleshooting.
- Tracking Bugs: Monitored bug status and resolution progress.
- Creating Test Documentation: Prepared test plans, cases, and scripts.
